Objective:

To develop internet applications that are fast, flexible, and user friendly.

Education:

Georgia Institute of Technology *Digital Media, MS May 2008*

- **GPA:** 3.72
- **Research Interests:** Television-Internet convergence, online communities and social networks, Comet (a.k.a. Reverse Ajax)
- **Relevant Coursework:** Advanced Internet Applications, Real Time Systems, Principles of Interactive Design, Design of Networked Media, Experimental Media, Visual Culture & Design

Boston College *Wallace E. Carroll School of Management, BS May 2001*

- **Triple Major:** Information Systems, Marketing, and Operations & Strategic Management
- **Independent Study Project:** Investigated tools and methodologies that aid in capacity planning and performance tuning for e-business infrastructure under the supervision of Dr. Gregory R. Heim.

Computer Skills:

- **Applications:** Dreamweaver, Flash, Photoshop, MythTV
- **Languages:** ActionScript, AJAX, CSS, JavaScript/JSON, HTML, MySQL, PHP, XML, XSL
- **Additional Skills:** Google AdSense, Google Analytics, Linux server administration, MediaWiki set up and installation, search engine optimization (SEO), Subversion (SVN), web development for mobile devices

Sample Projects:

- **Ninja Post:** Fast like a chat room but stable like a traditional forum. Built with AJAX, PHP, and MySQL. Visit <http://www.ninjabot.com>
- **Klicker:** A new approach to online television listings. Faster and easier to customize than existing solutions. Visit <http://klicker.tv>
- **Instant Search:** Search results by Google are rendered onscreen as the user types. Visit <http://www.instantsearch.org>

Experience:

Civitium LLC

Analyst

Alpharetta, GA

June 2006 – January 2008

- Analyzed feasibility of large scale wireless networks in urban and rural areas.
- Co-authored comprehensive industry report entitled “Municipal Wireless Broadband: New Business Models and Technologies Transforming the Broadband Market.”
